HEATLOK SOY[®]

SPRAY POLYURETHANE FOAM

HEATLOK SOY[®]

HEATLOK SOY[®] is a spray foam insulation that gives, in a single application, an engineered building envelope with a high long-term thermal resistance, an excellent air barrier, and a recognized vapor retarder. This high performance closed cell rigid polyurethane foam is used for commercial and residential perimeter wall insulation and is spray-applied by authorized applicators. With **HEATLOK SOY[®], DEMILEC (USA) LLC.** continues to pioneer advancements in high efficiency spray foam insulation which affirms **DEMILEC (USA) LLC.**'s commitment to environmental protection and superior quality of life.

ENERGY EFFICIENCY

- Exceptional air sealing
- Heating and cooling cost savings

SUSTAINABLE DEVELOPMENT

- Recycled and renewable resources
- Soy and vegetable oils

ECOLOGICAL SPRAY FOAM

- Zero ozone depletion
- Minimum impact on environment

EARTH FRIENDLY

- Soy based
- Recycled Plastics
- Zero ozone depletion blowing agents
